SPECIFICATIONS/SCOPE OF WORK

The Fuel oil must conform to A.S.T.M. Designation D396-48T issued in 1934, and with all revisions to date. A copy of the analysis of Fuel oil and Diesel fuel proposed shall be furnished with bid and analysis to be typical and of recent date of refiner.

All Fuel oil and Diesel fuel shall be free from grit, acid, fibrous material or other substances which might clog or injure the heater, pump, strainers, valves, burners or engines now installed or located at the places where deliveries are to be made.

The proceeding amounts are estimated quantities and are not guaranteed to be totals actually required and to be delivered during the contract period, and it shall be understood the quantities stated. Any changes in plant equipment or locations will automatically result in cancellation of the unfilled portion of the contract for type of fuel oil and diesel fuel for the location. Fuel oil for and new heating plants or increased facilities added by the town during the contract period shall be included in this contract at contract prices.

Deliveries shall be made by tank truck to storage tanks in quantities and as required at the various points noted in the proceeding schedules or which may be later added. Due care shall be taken by the contractor to prevent damage to any town property, including oil spillage in making deliveries and the replacing of filler caps properly. As storage capacity at all delivery points is limited to a small portion of yearly requirements, the contractor shall be equipped and will be required to establish and maintain automatic delivery service at all times during the contract period.

Delivery Default

Auto Fill: The successful bidder shall at all times be responsible, where applicable, for maintaining sufficient fuel supply in all tanks that are on Automatic Fill and will be held liable for damages or loss resulting from insufficient fuel supply. Specifically, on any occasion that a tank runs out of fuel the supplier will incur the cost for any damage to the tank. If the tank runs out of fuel and the Town calls the supplier and requests a fill, the supplier will be required to fill the tank within (2) Hours. Failure to fill the tank within (2) Hours shall be considered a default and if the Town is forced to secure supply from a third party supplier, the primary supplier in default shall be responsible to reimburse the Town for the difference between the delivered contract price and the price incurred on the open market.

All Fuel oil and Diesel fuel delivered into town storage tanks shall be measured by a meter which has been recently checked and sealed by the authorized sealer of weights and measures and subject to checking and approval by the sealer of weights and measures of the State of New Hampshire, his deputy, or the purchasing agent. A delivery slip shall be furnished and left with and signed for by a representative of the town for every delivery of Fuel oil or Diesel Oil. The delivery slip shall show a recording of the total oil delivered into the tank, shall show the name, address of the department where delivery is made, the date of delivery, type of product, and the name of the Contractor. The sealer of weights and measures, his deputy, or the purchasing agent of the town may order any tank vehicle loaded with fuel oil or Diesel for delivery to the town on to a set of scales before and after discharging its contents for the purpose of determining the quantity delivered. Any discrepancies resulting from such checking will be adjusted by the town in making payments. The supplier of the Fuel oil will pay for any service calls that may be incurred in the event any of our buildings run out of oil.

Title and Ownership of fuel supply shall pass to the parties upon safe transfer of product to each facility and signed acceptance by authorized personnel. Pricing to include all taxes, fees and transportation charges. All costs to deliver fuel shall be included in the fixed price.

The successful bidder shall be responsible for keeping sufficient Heating Oil in all said tanks listed that are on Automatic-Fill.
Town of Salem, NH anticipates using an estimated

20,000 to 25,000 gallons per year. (Automatic delivery)
